# Save IT costs and increase remote workforce productivity

## IT Cost Challenge

Documents are growing at an incredible rate and are becoming difficult to manage and costly

**£3,241** is the average cost to store 1TB of data per year.

**33%** of documents are duplicates, obsolete or trivial.

## Productivity Challenge

Searching and downloading documents when working from home is having a major effect on productivity

**80%** of information is stored in documents.

However only 20% of this information can be found.

**2.5 hours** per day employees waste searching for this information.

## Our Solution

Ocrato is a software solution that reduces file sizes by hyper compressing documents and removing duplicates and obsolete documents. Ensures all documents are searchable and faster to download by converting images and scanned documents into searchable PDF's. Streamlines your data migration and maintains compliance.

## Cost Savings

Company Size	File Size	Storage Cost	Cost Saving
Small	20TB	£64,820	£21,390
Medium	60TB	£194,460	£64,172
Large	125TB	£405,125	£133,692
Enterprise	275TB	£891,275	£294,120

## Productivity Gains

**68%** increase in document download speeds.

**SEARCH** is dramatically improved.

**COMPLIANCE** is maintained.

**DATA MIGRATIONS** are streamlined.

## Get Started

Run a free **Audit Health Check** of your environment that will generate a report detailing:

The number of images or scanned documents which are not searchable.

Duplicated or obsolete documents which are increasing your storage costs.

How much you could save on data storage costs with our unique hyper compression feature.

Download your free **Audit Health Check** at
