

# Learning with integrity. Fully automated online exam supervision.

Proctorio ensures the total learning integrity of every assessment, every time. With integrated identity checks and fully flexible supervision settings and criteria, online exams can be carried out in compliance with the GDPR and without third-party scheduling restrictions. Our cost-effective and quickly scalable platform eliminates human error, bias, and much of the expense associated with remote proctoring and identity verification.

Institutions worldwide use our solutions to verify test taker identities, secure exam content and protect the integrity of knowledge and exams.

## Unlimited Scalability

- No scheduling restrictions
- No technical restrictions
- Immediate results

## Data Security

- PII not required
- Zero Knowledge Encryption
- GDPR conform

## Compatibility

- Works within your existing LMS
- LTI or API integration
- Only need to download browser extension

**Over 80,000 proctored tests/day**  
**Over 99.99% uptime**  
**1,000+ higher ed and corporate partners**

# Remote Proctoring Features

## Automated Proctoring

Proctorio's software indicates potential breaches of integrity during the exam based on the settings and severity thresholds dictated by the exam administrator.

## ID Verification

Proctorio offers both Live and Automated services to verify test takers' identities before and/or during the exam.

## Unscheduled Exams

All of Proctorio's Live and Automated proctoring services are unscheduled and never require registration from users. Test Takers can take their exams when and where they want.

## Lockdown Browser

When enabled, this setting allows instructors to limit test taker access to other websites, applications, downloads, and functionalities of their personal device during their exam attempt.

## Content Protection

Proctorio employs WebSweep, an automated web monitoring tool that alerts instructors when exam questions have been posted online. If matching exam questions are found online, instructors can use the Report feature to initiate content take-down.

## LMS Integration

Proctorio integrates seamlessly with any existing LMS. This allows students to enter an exam with the same credentials that they would use for their LMS, so no additional personally identifiable information (PII) is ever required.
