— The central knowledge base of OECD expertise

Drawing on 60 years of data collection and analysis to drive better policies for better lives

The Organisation for Economic Co-operation and Development (OECD) is an international organisation whose goal is to shape policies that foster prosperity, equality, opportunity and well-being for all.

Working hand in hand with policy makers, governments and citizens, the OECD informs public decision-making bringing together 38 member countries on key global issues.

OECD iLibrary is recognised throughout the world as one of the largest and most reputable sources of internationally comparable statistical, environmental and socio-economic reports and data.

OUR RECOMMENDATIONS ARE PUBLISHED ON OECD iLIBRARY AND HAVE HELPED INFORM POLICY MAKERS, RESEARCHERS AND ANALYSTS TO IMPLEMENT THE BEST POSSIBLE RESPONSES IN THEIR COUNTRIES.

OECD collects data from national statistics offices, international organisations and other official sources and conducts analysis based on proven methodologies, enabling reliable, cross country comparisons. By identifying best practices and helping countries learn from one another, OECD contributes to improved policy making all over the world.

What librarians say about OECD iLibrary

GERMANY

“As an internationally oriented political foundation, OECD iLibrary perfectly complements and supports our work. OECD iLibrary is a useful resource for forward-looking, specialised libraries whose users work across the globe.”

Helmut Lenz,
Konrad Adenauer Foundation

MEXICO

“OECD iLibrary allows us to analyse global information and contextualise it nationally. We need data from other countries to connect the dots and find our way in an interrelated world.”

Verónica Soria Ramírez,
National Autonomous University
of Mexico (UNAM)

USA

“OECD iLibrary plays an essential role for social scientists needing high-quality, internationally harmonized statistics on a wide variety of economic and social topics ... Particularly useful to scholars is the ability to replicate by using the archival editions and the retention of forecasts back to 1967.”

Bobray Bordelon,
Princeton University
