

Examity

Examity

Available to purchase until 30/04/2023

Examity is one of the world's leading solution for learning validation. They work with colleges, universities, employers, and certification providers to create secure, high-quality educational experiences – and ensure that learners who play by the rules are honoured for their work.

Key Facts

Benefits

- Choice of Auto or Live Invigilation
- Tiered pricing based on amount of hours being bought
- Choice of 1 / 2 / 3 / 4 hour Live Invigilation exams - Auto Invigilation is not time-limited
- This Agreement is the only route to pre-purchase exam hours, letting you keep a better control on your budget
- Standard \$5000 implementation fee waived for Chest customers

Important Dates

Agreement start: 1 May 2020

Agreement end: 30 April 2023

Commitment Period

Exams, once purchased, are valid for two years only.

Eligible Institutions

Universities, colleges and other learning, educational and research bodies in the United Kingdom of Great Britain and the Republic of Ireland.

Background Information

This Agreement has come about following requests from the community.

Product Information

Supplier Details

Owner: Examity, Inc., a corporation registered in the Commonwealth of Massachusetts, at 153 Needham Street, Newton, MA 02464, USA (U.S. Federal Tax ID: 81-5178829VA)

Product Description

This Agreement is for Live Proctoring (live invigilation solution) and Auto Proctoring (automated premium invigilation solution) as configured for commercial sale and described on the Suppliers website at <https://examity.com/>. The content and functionality of the Software shall be as configured for commercial sale and not less than that which is provided with the Software by the Supplier to its other customers

LIVE PROCTORING

For high-stakes exams and critical certifications, Examity's Live Proctoring solution is the most secure choice for advanced online assessments. Beginning with live authentication, Examity's live proctor will first verify that the ID on file matches with the ID brought to the test, and then compare the two with a real-time webcam feed of the test-taker. Following a series of challenge questions and the completion of a digital signature, the test-taking environment then becomes the main focus. Examity's live exam proctor will conduct a 360° sweep of the room and workstation, ensuring any unauthorised materials are removed before testing can proceed.

Once live authentication is complete, the proctor will provide the test-taker with access to the exam. The live proctor will oversee the entire session, from authentication to test completion. Such a high level of security allows a proctor to proactively address suspicious behaviour or respond to a technical question, should such a need arise. Upon exam completion, an Examity proctor and an Examity auditor will review both the authentication process and proctoring session. Only after this review takes place will the entirety of the recorded session, along with the corresponding reporting data, be released to your Examity dashboard.

This level of live proctoring is recognised throughout the industry as the best choice for high-stakes exams presenting the highest possible level of security. And as an added advantage, Examity proctors are able to provide interactive technical support in real-time if necessary.

With Live Proctoring, institutions buy not only the number of exams they require, but also choose the length of exams required, from one to four hours.

AUTO PROCTORING

In today's increasingly complex test-taking environments, finding the right automated proctoring solution for your online assessments can be a challenge. Examity is here to change all that. Their proprietary, machine-learning algorithms were created to detect and capture any and all aberrant behaviour for your exams.

Automated Standard begins before the test does – with comprehensive auto-authentication. This process can be broken down into three distinct stages. First, a test-taker will submit an official ID and a real-time image taken from the webcam. These will be matched against the test-taker's ID on file. Next, the test-taker will answer a series of "challenge" questions to further verify their identity. Finally, the test-taker will submit a digital signature that measures the keystroke cadence, to be matched against the test-taker's original digital signature on file.

Once this three-step process is complete, the test-taker begins the exam and our automated proctoring technology takes over – monitoring the test from start to finish. Once the proctoring session is complete, Automated Premium provides an additional level of scrutiny. At the conclusion of every automated premium proctoring session, Examity will conduct a human audit that will review the authentication and exam session, along with all AI-related findings. Following this review, the exam video along with time stamped violation flags and comments, will be released to the Examity dashboard.

With Auto Proctoring, the duration of the exam doesn't matter when it comes to purchase - institutions buy a number of exams, valid for two years from date of purchase.

STORAGE

Standard storage of exam videos is thirty days where there are no red flag violations and one year when red flag violations are present. "Red flag" is defined as a rule violation that can reasonably be understood to constitute cheating or IP theft (for example, taking a picture of the exam questions). Each additional year of storage, if requested by the Licensee, will incur a cost of 0.50 US Dollars per exam video stored. Each video includes audio and is the full proctored exam, including ID authentication and exam submission.

ABOUT EXAMITY

Examity entered the online proctoring market in 2013. At the time, there were a number of providers already in the space, but each was offering a single-service style solution, e.g. auto proctoring. As they met and connected with university, certification, licensure, and pre-employment partners, they realised that a new online proctoring approach was required.

They developed their solution to encompass a variety of proctoring styles, from automated through to live. In addition, they heard time and again that test-takers require immediate, and ongoing support, on their schedule. With this in mind, they built their team (now 500 strong, across 4 times zones) to provide students with 24/7 support, through familiar and accessible channels.

Since 2013, they are both excited and honoured to have experienced more than 50% growth, every year they have been in business. They

take great pride in their ability to handle more than 1 million assessments per year. They maintain partnerships with more than 500 enterprise testing organisations, corporations and universities. Notable partners include: Amazon, Tableau Software, Coursera, Duolingo, Kaplan, Indiana University, Penn State University, the College Board, the University of Sydney and Western Governors University.

Service and Support

Trial

Demos are available from Examity. If something more involved is required, Examity will provide a WebAPI integration document or even do a very limited number of live tests with staff as students to show how it works. Please contact Chest Help to arrange this.

Product Documentation

Product documentation can be found in this [student resource centre](#) for automated proctoring/record and review – you will see student guides for different LMS platforms, troubleshooting guides, tips, etc.

Training and Training Materials

Training documents can be provided directly from Examity if required. Examity also offer online training for groups and individuals if required

Technical Support

Once the order form is signed, students can access Examity's service 24/7/365 via email, phone and live chat. Customers can access support in the same way and will have a dedicated US-based account manager for the entire life-cycle of the licence.
