

codemantra

codemantra

Codemantra

Available to purchase until 31/03/2024

accessibilityInsight™, from codemantra, is an AI-driven Intelligent Document Processing (IDP) platform. It automates digital document accessibility compliance, extracts, classifies and captures document insights, and transforms any document into any desired digital format.

Key Facts

Benefits

- Heavily discounted pricing for the academic community.
- Compatible with your current LMS platform.
- High-speed processing delivering efficiencies.
- Home use is permitted.

Important Dates

Agreement start: 1/3/2023

Agreement end: 31/03/2024

Subsequent invoice date: n/a

Commitment Period

Purchased service must be used within twelve months from the licence commencement date shown on the Order.

Licence Type

Various – see the 'Products and Pricing' tab for more information.

Trial

Trials are available. Please see the 'Service and Support' tab for more information.

Eligible Institutions

This Agreement is available to Institutions of Higher and Further Education and Research Councils in the United Kingdom, to Universities and Colleges of Further Education in Ireland, and to Associated Sites.

Supplier Details

Licensor: codemantra U.S. LLC, 1500 District Avenue, Burlington, MA 01803, USA

Product Description

The *accessibilityInsight*[™] platform includes three core accessibility solutions.

The first two are fully automated:

- **AccessibilityCheck** is used for accessibility compliance reporting – helping organisations understand the scale and nature of their compliance issues
- **accessibilityFix** remediates PDFs ensuring they are WCAG compliant

The third core solution provides tools for operators to interact manually with remediated documents:

- **accessibilityReview** allows organisations to review, Quality Assurance and perform interactive remediation as needed, to add alt text descriptions.

In all instances the licences are valid for 12 months from start date.

The *accessibilityInsight*[™] platform derives structure and intelligence from documents using a two-pronged approach. The approach is modelled on how the human eye generates visual images of a document, which are then passed on to the brain to decode information. In *accessibilityInsight*[™], an image processing module generates the visuals and works in tandem with the AI-based core engine, which extracts structure from the document using purpose-built machine learning (ML) models. The structure that the AI-based engine decodes is then used to transform the document into a format that is compliant with international accessibility standards.

Automated alt text production: *accessibilityInsight*[™] can auto-generate alt text for maths equations. The machine learning power of the platform combined with codemantra's content transformation tools provides customers with alt text that requires a light touch QA before the mathematics content is published.

accessibilityInsight[™] can concurrently manage thousands of document processing jobs every day. This has proven practical for the digitization of vast backlists of academic publications at pace. In July 2021, [codemantra worked with the University of Westminster](#) to make 12,000 archived pages accessible for people with disabilities in 8 days.

codemantra has a strong track record of ensuring robust data security and compliance in its management of customer assets for its customers, who include international non-governmental agencies, national, state and local government, higher education institutions and other public and private sector organisations. codemantra is SOC 2 compliant and ISO certified for quality management. The company leverages AWS to protect customer data and secure the *accessibilityInsight*[™] platform against vulnerabilities and attacks.

Service and Support

Trial

For a free trial of Codemantra, contact help@chest.ac.uk.

Product Documentation

The complete user guide offering step-by-step assistance to using *accessibilityInsight*[™] can be downloaded here: [codemantra Accessibility Insight User Guide - Version 2.4.0](#)
